Background

- In January 2023 the ECC steering group, community healthcare West (CHW) nominated staff to participate in the RCSI “Embracing New Ways of Working “ programme.
- Participants from University Hospital Galway and Galway Primary Care were asked to focus on developing an Integrated discharge team that would enhance the existing community intervention team(CIT)
- A need was identified to develop an integrated discharge team between GUH and Primary Care to support timely hospital discharge.

Process

Desired Outcome

Implementation and development of new way of working
